Advantech Corporation Joins JMP Engineering, Inc.

Released December 19th, 2016

Fairfield, NJ – Today, JMP Engineering, Inc. announced that Advantech Corporation, a full-service control, instrumentation and automation company located in Fairfield, NJ, has joined JMP's growing organization, continuing their focus on becoming North America's leader in the provision of engineered automation and process control solutions.

The strategy behind Advantech joining JMP Engineering includes:

- **Leveraging** our strong alignment between our companies: culture, values, and customer success.
- **Growing** our collective geographic reach in the northeast and further scale our northeastern U.S. operations around the Philadelphia and New Jersey markets. Specifically, we will be able pool our engineering resources to pursue larger opportunities and projects.
- **Diversifying** JMP's portfolio into the U.S. water and waste water segments, while allowing the Advantech team to train and provide industry knowledge to JMP engineers.

Scott Shawyer, President and CEO of JMP stated, "I am very thrilled to have Advantech join the JMP team for a number reasons. They have an impressive and complementary client base in key markets including; water and wastewater, power and utilities. Their employees have a wealth of industry domain knowledge and experience. Additionally, Advantech is strongly aligned with our company's culture, values, and methodologies for achieving customer success. I look forward to seeing our teams come together and our combined capabilities generate even greater customer success."

Paula Hauer, President of Advantech Corporation shared, "As Advantech continues to grow, I could not be more excited to bring Advantech together with JMP! First and foremost, joining JMP will help build our geographical customer reach in the water and wastewater sector. Second, we will increase our organizational and operational scale for Advantech's employees, customers, and partners. Lastly, we will expand our solution offerings to our customers through JMP's expertise in Process Automation, Controls, Energy Management, and Smart Robotics. This strategic alignment with JMP will allow Advantech to continue to provide the highest degree of excellence in this ever-evolving marketplace."

About Advantech Corporation – Advantech Corporation (Fairfield, NJ), founded in 1986, is a UL Certified, Instrumentation and Control Systems Integrator, providing complete turn-key Integration and Automation Solutions, including Instrumentation, Control Systems, PLCs, SCADA, and Networking. The company serves all private manufacturing industries, and is a preferred and specified Systems Integrator for Municipal and Government Agency Construction projects in the areas of Water and Wastewater, Environmental and Power.

Their customers include the New York Department of Environmental Protection (DEP), New York Power Authority, New York Metropolitan Transportation Authority (MTA), New York Department of Sanitation, Con Edison, Pfizer, Wyeth, Emerson, US Military, and countless others over the past 30 years. AdvanTech is a member of the Control System Integrators Association (CSIA), and has an in-house, UL certified panel shop. Visit advantechcorp.com for more information.

About JMP Engineering, Inc. – JMP is an engineering services company with thirteen locations in the U.S. and Canada, focusing on Fortune 500 manufacturers and producers. The company provides engineering services and turn-key solutions in the areas of control system integration, process automation, information and analytic solutions, and smart robotic applications. JMP has delivered over 15,000 solutions to more than 1,000 clients worldwide over the course of its 29-year history, and has been recognized with awards which include the Control Engineering System Integrator Hall of Fame, the Packaging Digest Integrator Hall of Fame, the Microsoft Impact Award for Data Management Solutions, and has been nominated by our employees four years in a row for the “Top 50 Great Places to Work in Canada” for medium sized companies.
