UNMATCHED LEADERSHIP

IN CONTROL SYSTEMS

Since 1970, Technical Systems Incorporated is the leader in providing integrated solutions and support for the Water/Wastewater and Public Infrastructure Markets. A combination of experience, technical expertise, exceptional reliability and a “whatever it takes” attitude has made TSI the preferred choice among municipal clients.

TSI offers comprehensive services and systems for a variety of demanding applications. Our technical staff has earned a strong reputation for technological expertise in telemetry, Supervisory Control and Data Acquisition (SCADA), data collection and instrumentation and control systems. Based near Seattle, TSI has successfully handled thousands of projects throughout the U.S.

The scope of our work ranges from consulting to complete control system design, build and support services.

Expect Excellence

ENGINEERING AND DESIGN

TSI is a leader in process automation and control system design and engineering. Our engineering staff approaches your project with the experience gained from successful completion of over 7600 previous jobs. Whether it’s a water or wastewater facility, fish hatchery, or transportation project, TSI has the experience and resources to meet your automation and control system needs.

- Team Engineering and Project Management.
- Detailed design and installation drawings, including P&ID’s, loop drawings, wiring diagrams, installation interconnect drawings, and panel layout and fabrication drawings.
- Coordination with all trades to insure a successful installation, your single source of responsibility – start to finish.

SOFTWARE DEVELOPMENT

TSI has the software engineers to complete any task. Our experienced engineers continue to upgrade the skills required to be on top of a rapidly changing technological world. We maintain strategic relationships with major software companies to insure that we are ready to provide the latest in capabilities and functionality.

- PLC Programming for all brands.
- Graphical user interface and HMI software development.
- Complete simulation and testing.
- Complete documentation and training at operations and technical levels.

FABRICATION

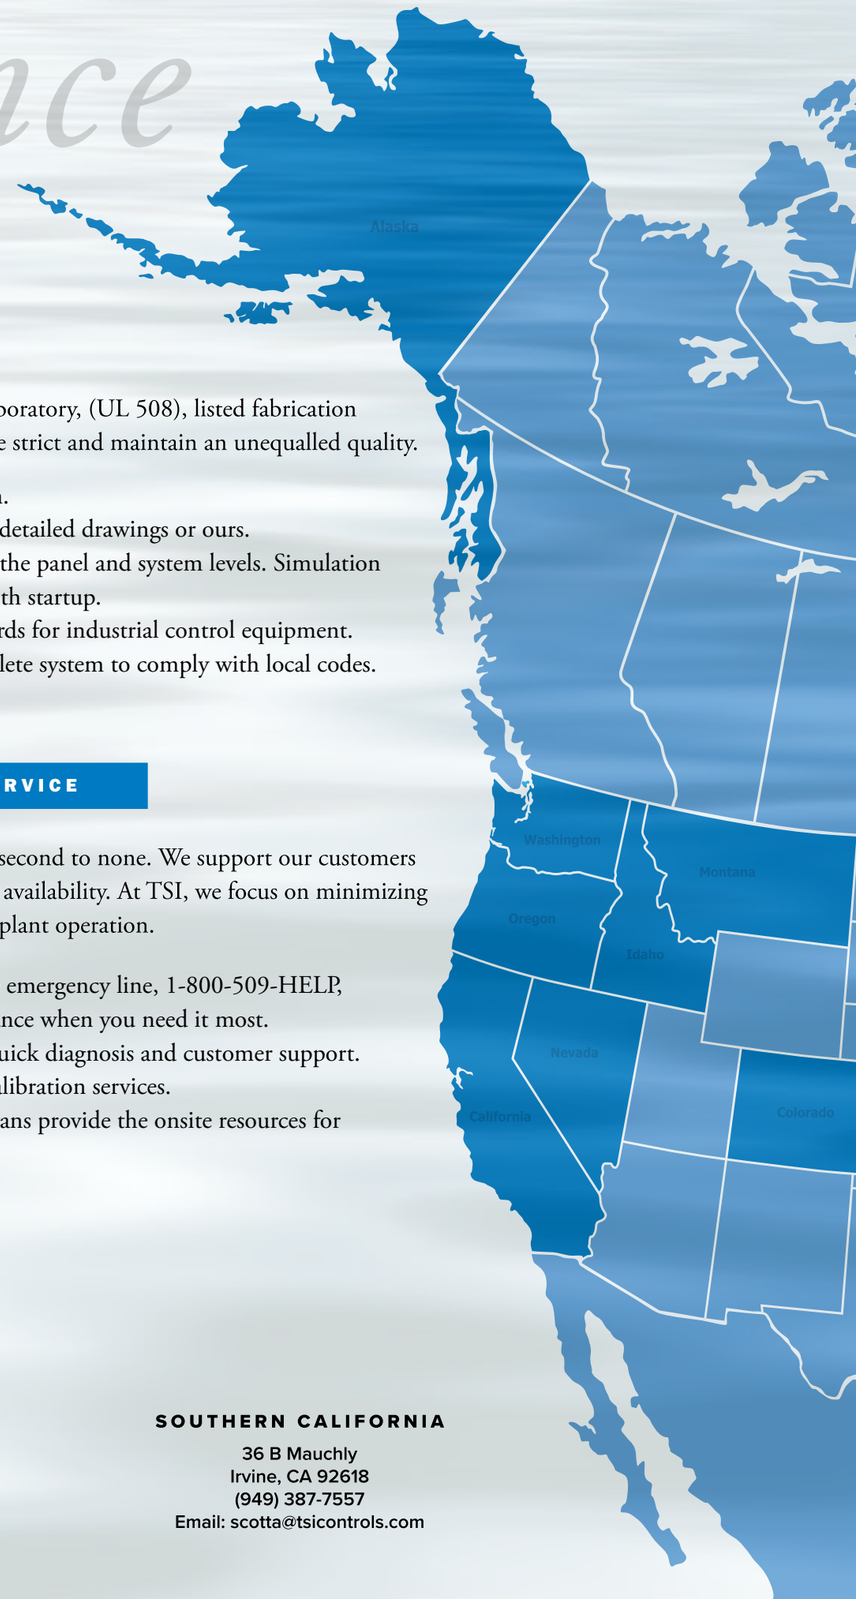

TSI is an approved Underwriters Laboratory, (UL 508), listed fabrication facility. Our fabrication standards are strict and maintain an unequalled quality.

- Complete system fabrication.
- Panel fabrication from your detailed drawings or ours.
- Witnessed factory testing at the panel and system levels. Simulation is provided to insure a smooth startup.
- Manufactured to UL standards for industrial control equipment. Panels are labeled as a complete system to comply with local codes.

TOTAL COMMITMENT TO SERVICE

TSI maintains a service department second to none. We support our customers with the best in technical ability and availability. At TSI, we focus on minimizing downtime so that you can maintain plant operation.

- Calling our 24 hour toll free emergency line, 1-800-509-HELP, will provide technical assistance when you need it most.
- Remote modem access for quick diagnosis and customer support.
- Routine maintenance and calibration services.
- Our fully equipped service vans provide the onsite resources for quick and easy repair.
