

JMP Engineering Adds Rockwell Automation's *Power Quality and Energy Management* Designation to its Unmatched List of Achievements

Released August 22nd, 2016

LONDON, ON – JMP Engineering Inc. (JMP), an engineering services company providing turnkey solutions in Controls, Information and Smart Robotics for Fortune 500 manufacturers and producers, announced today that they have officially met the requirements to be designated as a Rockwell Automation *Power Quality and Energy Management Solution Partner*. This achievement is in addition to the two other Solution Partner designations they hold: Control and Process. **JMP is one of only four Rockwell Automation Solution Partners in North America** and the only Solution Partner in Canada, to carry the Power Quality and Energy Management designation.

JMP's Rockwell Automation Solution Partner status, coupled with being CSIA (Control System Integrators Association) Certified and RIA (Robotic Industries Association) Certified, sets JMP apart as being the **only company in the world** with these three unique and complementary classifications.

“We are excited to have demonstrated our experience and met the program requirements necessary to receive the Rockwell Automation, Power Quality and Energy Management designation,” said Steve Szamocki, Vice President of Sales and Marketing, JMP Engineering. “We would like to thank our trusted friends at Rockwell: Tom Hetherington, Kamil Karmali, and Terry Jantzi for helping and guiding us through this process. Adding another Rockwell designation to our list of accomplishments only strengthens our twenty-nine-year relationship with them and their world-class distribution partners. We look forward to continued alignment with Rockwell in building and delivering low-risk projects and solutions for our customers.”

“JMP has demonstrated strong Power Quality and Energy Management experience and has a great track record of delivering successful turn-key projects in Food, Automotive and Powerhouse Related Segments and Applications,” said Randy Sherer – Global Marketing Lead, Power Control, Rockwell Automation. “For this reason, we are pleased to identify JMP as a Rockwell Automation Power Quality and Energy Management Solution Partner.”
