

JMP Expanding Texas Presence with Robust Controls

January 22, 2018

LONDON, ON – Over the last 30 years, JMP Engineering has experienced significant growth across North America. To further support their growth strategies, JMP would like to announce that as of January 19, 2018, they have acquired Robust Controls to better serve and support their growing customer base in Texas. Robust Controls is a leading controls and systems integration company providing engineering services in Dallas, Texas, and the surrounding area.

Scott Shawyer, President and CEO of JMP, stated, “I am very excited to have Robust Controls join the JMP team for numerous reasons including their employees having a wealth of application knowledge and industry experience to solve our customers toughest automation and production problems. Also, I look forward to seeing our teams come together, and our combined capabilities generate even greater customer success.”

Reddy Arimanda, President of Robust Controls, shared, “As Robust Controls continues to grow, I could not be more excited to bring our teams together. Joining JMP will help us expand our geographical reach and we will be able to utilize JMP’s organizational size and scale to help solve our customer’s challenges.”

The strategy behind Robust Controls joining JMP includes:

- Expand their solution offerings, and technology migrations for customers in specific industry segments including semiconductor, oil & gas, water/wastewater, and consumer product goods manufacturing.
- Collectively expand their geographic reach, and combine their engineering resources to execute larger process automation, control system, information, MES (manufacturing execution systems), and smart robotic projects.
- Help customers reduce project execution risk by leveraging JMP’s infrastructure, proven processes, as well as the size and scale of their joint operations.

About JMP Engineering

JMP is an engineering services company with fourteen business units in the U.S. and Canada, focusing on Fortune 1,000 manufacturers and producers. The company provides engineering services and turnkey solutions in the areas of process automation, control system integration, information and analytic solutions, and smart robotic applications. JMP has delivered over 20,000 solutions to more than 1,000 clients worldwide over the course of its 30-year history. Additionally, they have been recognized with several awards including, Control Engineering System Integrator Hall of Fame, Packaging Digest Integrator Hall of Fame, and Microsoft Impact Award for Data Management Solutions. They have also been nominated by their employees five years in a row for the “Top 50 Great Places to Work in Canada” for medium-sized companies.

About Robust Controls

Robust Controls provides controls and automation services to industrial, municipal, and building automation clients and provides those services to customers in a variety of industries including Semiconductor, Facilities Controls, Industrial Controls, Oil Pipeline, Water, Wastewater, De-ionized Water, and Industrial Wastewater. Their goal is to deliver a fully functional control system while making sure the project is done correctly the first time without exception.
