

Get on the *FastTRAK* to solving real-world application problems.

Benefits of *FastTRAK* Specialty Courses

- Presented on-demand and at a faster pace
- Private one-on-one training by certified professionals
- Never wait for a traditional training course to become available
- Classes are never cancelled
- Never wait for other students to catch-up to where you may be in the learning process
- Reduce the amount of time spent in a classroom and away from the office

FastTRAK specialty courses provide the same curriculum that is typically taught in 3-5 days, condensed to 1 or 2 days of personalized instruction. Each course is led by seasoned professional instructors with advanced technical credentials.

The course content is tailored to your individual and / or application interests with a high degree of flexibility not possible with traditional, multi-person courses.

Please contact our Training Administrator, Toni Brueggman (atb@DSAAutomation.com or 724-942-6330 x100) for pricing, details, and exceptional service.
