

APPLIED MANUFACTURING TECHNOLOGIES

2019 COMPANY OVERVIEW
SCOTT NICOL, SENIOR ACCOUNT MANAGER 586.690.3209

THE AMT ADVANTAGE

AMT creatively solves robotic automation challenges.

We provide complete engineered solutions with talented, experienced engineers and NO product or hardware agenda. This allows us to offer a unique and unbiased automation solution that fits your robotic automation needs regardless of size.

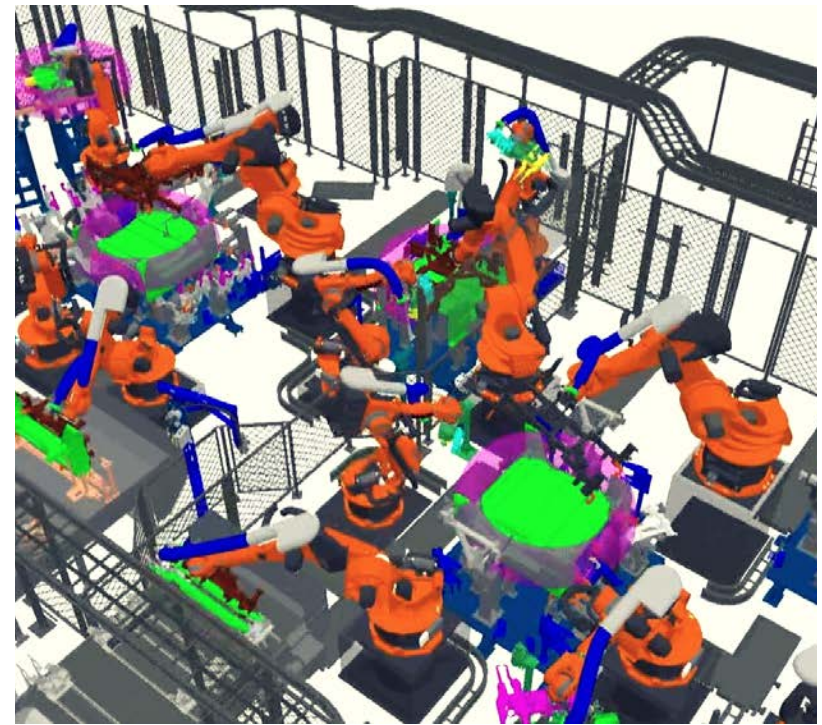

We have over 29 years as a full-service Automation Solutions Integrator with the unique ability to engage with a manufacturer at any point in their process.

At AMT, we have successfully built a company of relevant automation robotics technologies under one roof with a depth of knowledge and experience that exists solely to add value to our customers' performance.

OUR PASSION IS AUTOMATION

WE WILL FIND THE RIGHT SOLUTION

Founded in 1989, Applied Manufacturing Technologies has become an industry leader in robot automation engineering and robotics in manufacturing globally. Over 120 experienced and highly trained robot automation engineers with over 1,250 combined years of experience are engaged in robot automation projects across an array of industries. Our deep bench of experienced, innovative automation engineers, consultants, and programmers are ready to hit the ground running with projects at any stage of development, from conceptualization and design to troubleshooting and expansion. We have engineered over 25,000 robot automation systems worldwide on over 5,500 projects for over 600 plus customers.

HOW CAN WE HELP YOU?

ENGINEERING SERVICES

We provide contracted services for industrial controls, robot programming, mechanical design, and simulation. Our engineers quickly become valued members of our client's teams.

SYSTEM BUILD AND INTEGRATION

Formed in 2002, AMT's Automation Systems Group specializes in robotic integration and provides complete automated turn-key systems from concept and design through field start-up and production support.

ADVANCED ENGINEERING SOLUTIONS

Our Advanced Engineering Solutions group specializes in solving manufacturing automation challenges. Our systematic approach to manufacturing automation provides our customers with quantifiable information for making sound technical and business decisions.

Our dedicated team provides expert support in the areas of Automation Consulting, Application Development, and Process Analysis.

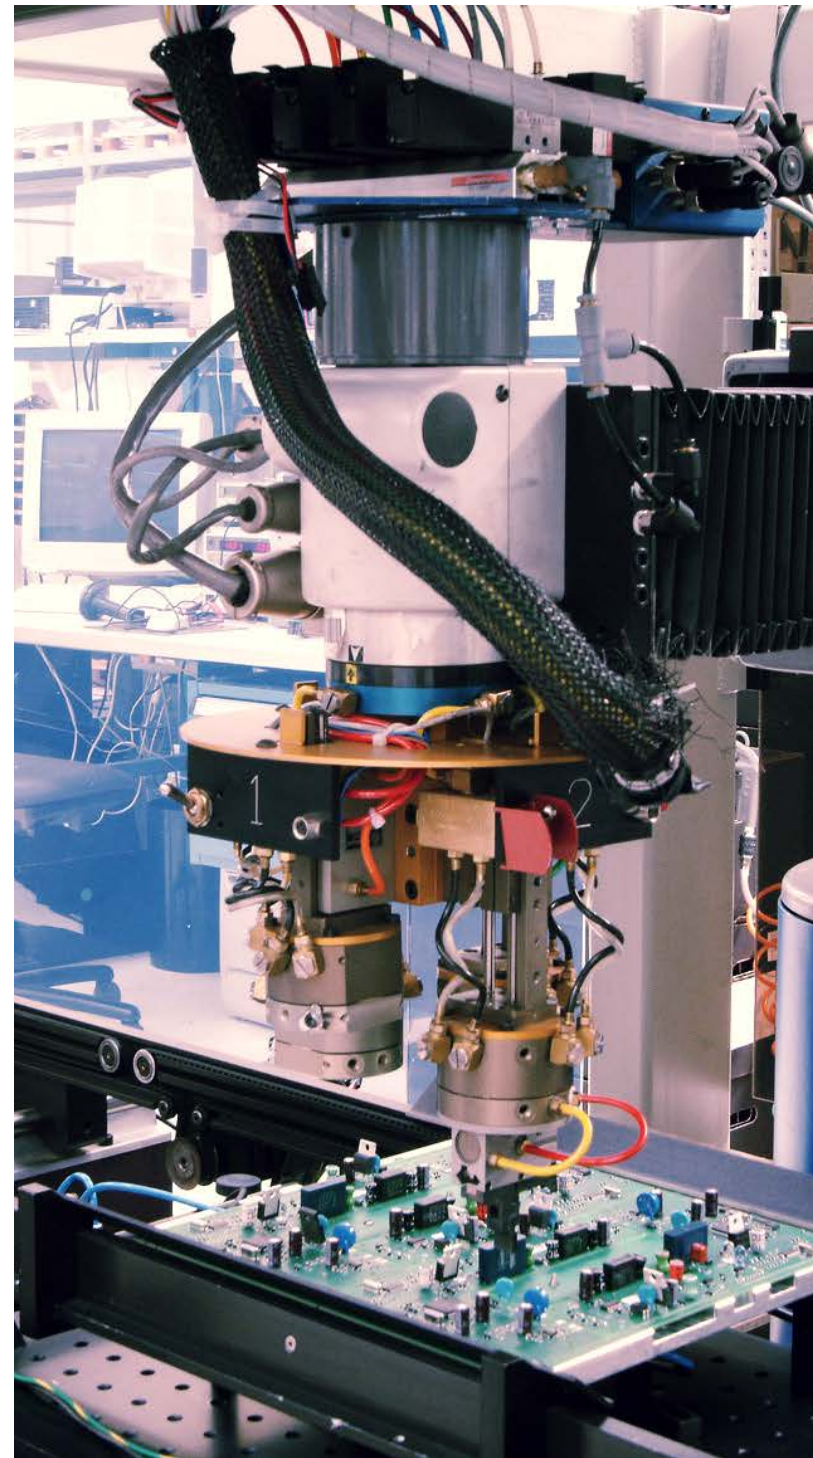

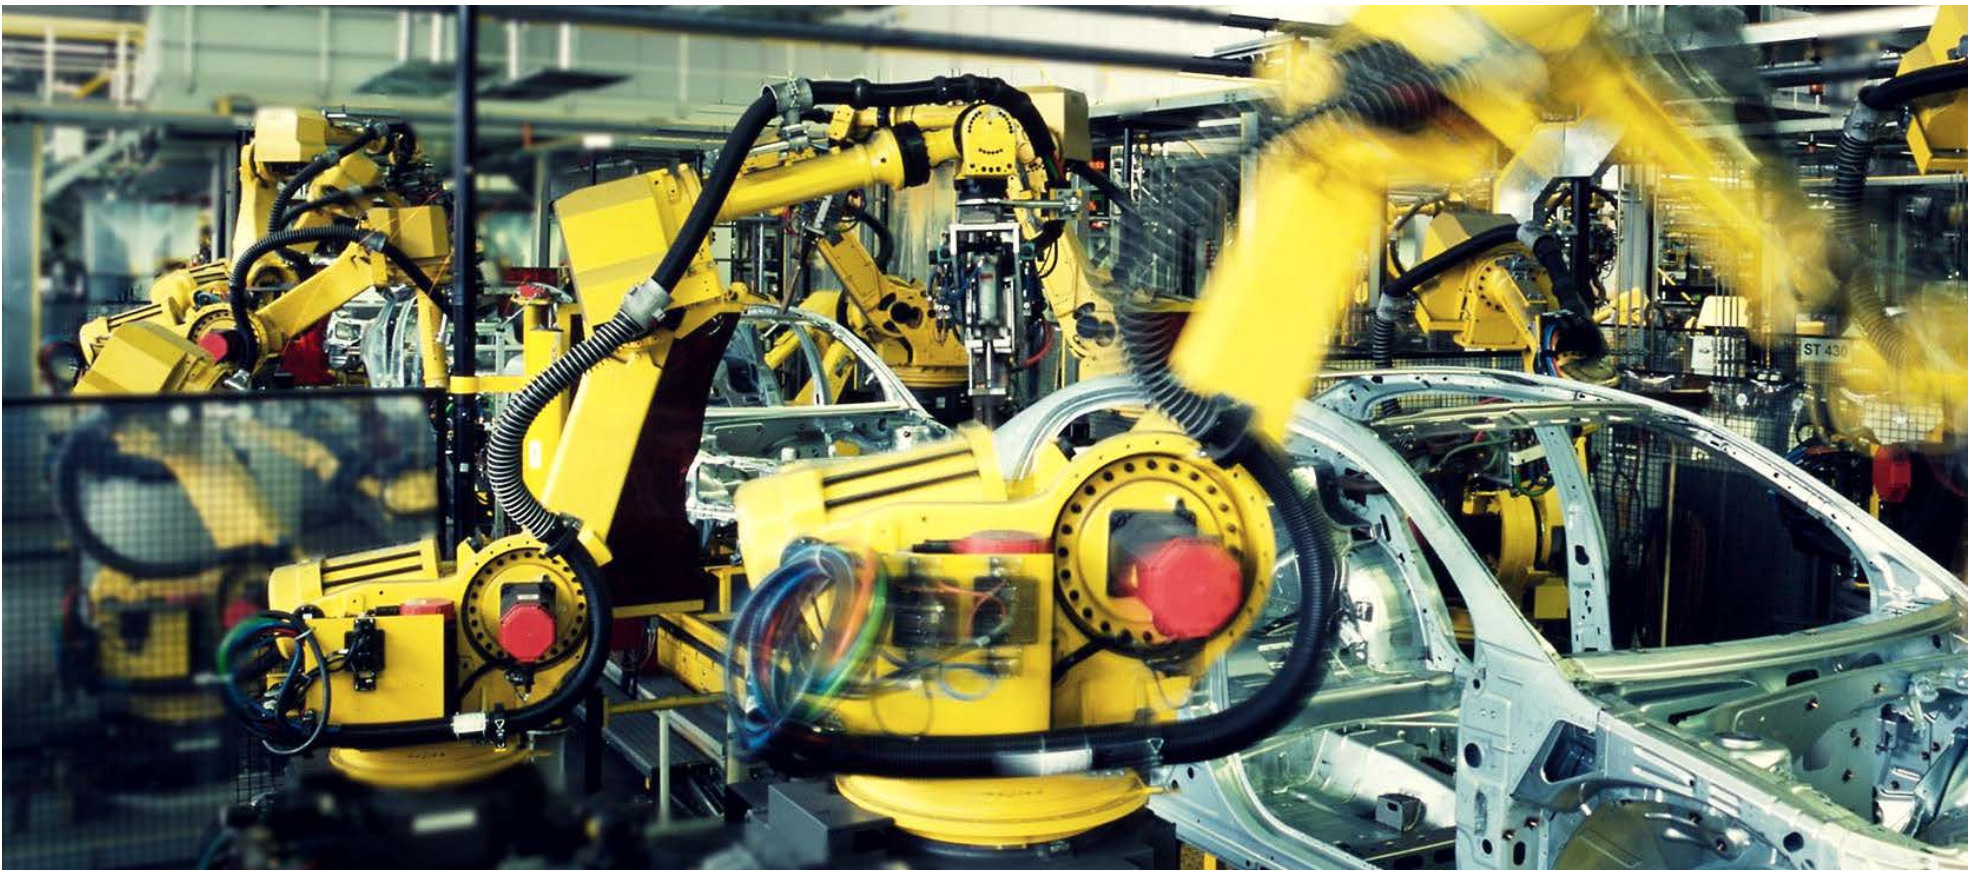

OUR VALUE PROPOSITION

- Core automation and manufacturing technologies in a single engineering organization
- Customized engagement model to fit each client's needs
- No hardware or software agenda

"WE NEVER INTENDED TO BE JUST ANOTHER AUTOMATION ROBOTICS & ENGINEERING FIRM. OUR EXPERIENCE AND SKILL IN APPLYING MANUFACTURING TECHNOLOGY IS UNSURPASSED IN THE INDUSTRY"
