

About company

INDUSOFT-UKRAINE was founded in 2003. Today, the company occupies a leading position in the digital transformation market and has a high level of competence in creating automated systems for operational production management.

Our company specialists have created standard industry solutions for most typical tasks of automating production processes, such as dispatching, calculation of an agreed material balance for sections and production, quality management, monitoring of the operation of process equipment, monitoring and accounting for energy consumption, integration with ERP- systems. Solutions are carefully designed to ensure high reliability and maximum functionality.
